

Low Profile, Soft Roll-Up Tonneau Cover

EASY REMOVAL AND RE-INSTALLATION

Quick attach header guide comes pre-assembled. Just pull the lever back and attach to the side rails. No bolts or tools required.

Solid rear header and bows roll-up with the cover and self-store behind the cab with two security straps.

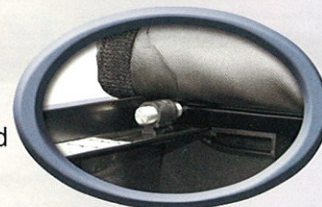

Engineered for a sleek, clean look—Less than 1" above the truck bed!

AUTOMATIC TENSION CONTROL

Velcro® brand "floating hook" design uses technology that allows the hook on the rail to move, or float, back and forth. Provides for less wear and tear.

The patented automatic tension control keeps constant tension on the header at the front of the bed and keeps the cover tight.

SUPERIOR FASTENING

Velcro® brand loop is a full 1-1/2" wide for superior fastening the entire length of the bed rail—No snaps or adhesives to fail.

The "floating hook" and tension control work together to automatically keep the cover tight in fluctuating temperatures—Even when the cover is closed!

ACCOMMODATES ACCESSORIES

The inside mount design makes it easy to use with other accessories such as bed rails, bed liners and rail caps.

Available Colors: Navy, Forest Green, Buckskin, Gray or Black

Seals on all 4 sides and exclusive corner seals help keep elements out.

Automatically secures when latched at the rear. Provides added security when used with locking tailgate.
